

# NavAQ

Easy Echosounder Data Acquisition!

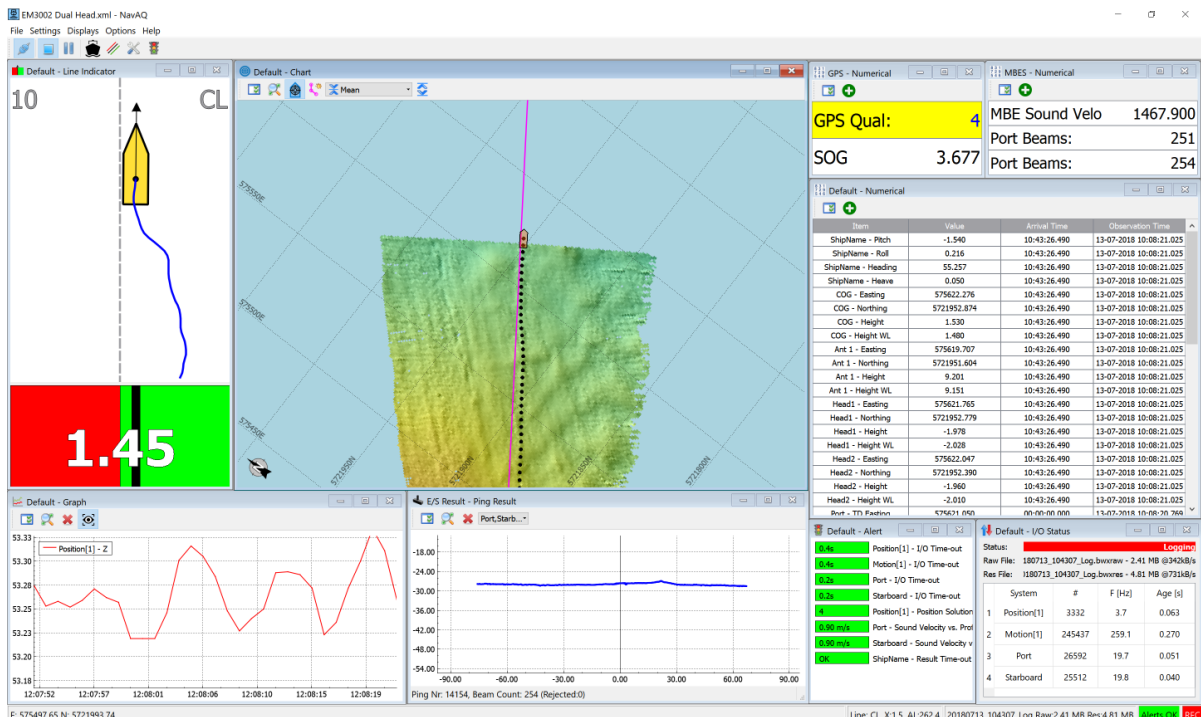

NavAQ is a user-friendly navigation and data acquisition program for Single Beam and Multi Beam Echosounders. Positioning and Bathymetry results are computed in real-time, and visualized in various displays. All Raw sensor data is logged for further processing. Seamless integration with AutoClean and Auto-Patch.

The Raw and result data are presented in various types of user-definable displays:

- Raw Single Beam Echosounder Echogram.
- Result for Multibeam Echosounder swaths.
- Chart View with grid and backgrounds.
- Graphic/Numeric/IO Status/ Alerts display.
- Left/Right Indicator for planned line.

A full range of equipment drivers is available:

- Multibeam: Kongberg, Teledyne Reson , R2Sonic, Norbit, WASSP.
- Motion: Ixsea, SBG, Applanix, Kongsberg, NMEA.
- Single Beam: Kongsberg, Odom Teledyne NMEA.
- NMEA position and Generic user defined data.
